OBJECTIVE

I would like to obtain my Ph.D. degree to develop my experience in management and hydraulic structures, especially dams. Because of the many current problems in the dams in Iraq and the need for the construction of new dams and maintenance of existing dams.

EXPERIENCE

Chief Engineer and Head of the Department Ministry of water resources Iraq

November-2017 – Currently

Supervision and follow-up of projects and the development of contingency plans in floods and times of water scarcity

Student master degree technical university of civil engineering (UTCb) Romania

November-2014 – July-2017

my thesis title is "FINITE ELEMENT ANALYSIS FOR EARTH-FILL DAM REGARDING SEEPAGE CONTROL." I got ranked first-rate 9.67 from 10.

Head of Planning Department Ministry of water resources Iraq – Baghdad

March-2005 – October-2014

Study the feasibility of economic and engineering projects and prepare an annual plan for the ministry in terms of the possibility of executing contracts.

Site engineer Al hadbaa company for dams' construction north of Iraq

November-2000 – August-2005

the project of constructing an earth dam in the north of Iraq and had added a great experience in this field where the construction of the dam is an integrated project in terms of civil engineering and hydraulic

EDUCATION

Master of Science in Civil Engineering UTCb, ROMANIA Romania2017

Bachelors of Hydraulic Structure Engineering University of Baghdad Iraq2000
